DECISION ON PETITION
UNDER 37 CFR 1.181

This decision is in response to applicants' 17 July 2002 "Status Inquiry", which is being treated as a petition under 37 CFR 1.181 requesting that the "NOTIFICATION OF ABANDONMENT" (Form PCT/DO/EO/909 mailed 02 July 1997) be vacated. The petition is **GRANTED** as follows.

BACKGROUND

On 16 April 1997, applicants filed U.S. application 08/817,549 as a national stage entry of international application PCT/US95/13296. A signed declaration was not included with the application papers. However, applicants provided an authorization to charge the filing fees to counsel's Deposit Account No. 06-2140.

On 23 May 1997, applicants filed a signed declaration, a small entity statement and an authorization to charge the surcharge in the amount of \$65 to counsel's Deposit Account No. 06-2140.

Notwithstanding the above, on 02 July 1997, the DO/EO/US mailed a "NOTIFICATION OF ABANDONMENT" (Form PCT/DO/EO/909) informing applicant that U.S. application 08/817,549 is abandoned because applicants purportedly failed to provide the full U.S. Basic National Fee by 20 months from the earliest priority date as required under 37 CFR 1.494(b)(2).

DISCUSSION

A review of the application file reveals that applicants provided the Basic National Fee in a timely manner as the PCT Demand was filed prior to the expiration of 20 months from the priority date. The time period for filing the Basic National Fee expired on 18 April 1997. The Form PCT/DO/EO/909 mailed 02 July 1997 was sent in error. However, the declaration filed on 23 May 1997 is defective under 37 CFR 1.497 because it fails to identify all the inventors. The international application identifies three inventors, whereas the declaration only identifies two of the three inventors.

CONCLUSION

Accordingly, the Form PCT/DO/EO/909 mailed 02 July 1997 is hereby **VACATED**.

Accordingly, this application is being returned to the DO/EO/US to prepare a "NOTIFICATION OF MISSING REQUIREMENTS UNDER 35 U.S.C. 371 AND 37 CFR 1.494 OR 1.495" (Form PCT/DO/EO/905) indicating an oath or declaration and the surcharge for submitting an oath or declaration later than 30 months from the earliest priority date.

Each paper letter or communication relating to an international application during the international stage for which a date of filing is to be obtained as of the date of mailing must have its own certificate and the "Express Mail" label number as a part thereof or attached thereto. When, as here, the certification is presented on a separate sheet, that sheet must (1) be signed and (2) fully identify and be securely attached to the paper or fee it accompanies. Identification should include the serial number and filing date of the application as well as the type of paper being filed, e.g. complete application, specification and drawings, responses to rejection or refusal, notice of appeal, etc. If the serial number of the application is not known, the identification should include at least the name of the inventor(s) and the title of the invention.

The label number need not be placed on each page. It should, however, be placed on the first page of each separate document, such as, a new application, amendment, assignment, and transmittal letter or a fee, along with the certificate of mailing by "Express Mail". Although the label number may be on checks, such a practice is not required. In order not to deface formal drawings it is suggested that the label number be placed on the back of each formal drawing or the drawings be accompanied by a set of informal drawings on which the label number is placed.

DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 1-9 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 1-9 are drawn to a computer implemented process that merely manipulates data or an abstract idea, or merely solves a mathematical problem without a limitation to a practical application in a technological arts.

In order for a claimed invention to accomplish a practical application, it must produce a "useful, concrete and tangible result" *State Street*, 149 F.3d at 1373, 47 USPQ2d at 1601-02 (see MPEP 2106.II.A). A practical application can be achieved through recitation of "a physical transformation outside the computer for which a practical application in the technological arts is either disclosed in the specification or would have been known to a skilled artisan", or "limited to a practical application within the technological arts" (MPEP 2106 IVB2(b)). Currently, claims 1-9 meet neither of these criteria. In order for the claimed process to produce a "useful, concrete and tangible" result, recitation of one or more of the following elements is suggested:

- * The manipulation of data that represents a physical object or activity transformed from outside the computer (MPEP 2106 IVB2(b)(i)).
- * A recitation of a physical transformation outside the computer, for example in the form of pre or post computer processing activity (MPEP 2106 IVB2(b)(i)).

* A direct recitation of a practical application in the technological arts (MPEP 2106 IVB2(b)(ii)).

Allowable Subject Matter

3. Claims 10-15 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter:

Regarding claims 10 and 11, the prior art, taken either singly or in combination, does

not teach:

- an adaptive encoder operative to... a small accumulated frequency.

Regarding claims 12-15, since they depend upon claim 10, they are also allowable for the same reason.
